Welcome to Wicks Aircraft and Motorsports Website

Wicks Aircraft and Motorsports is a parts and material supplier with a stellar reputation for providing great customer service and speedy shipping. We have a huge selection of parts and building supplies in stock and ready to ship the same day the order is placed. We carry some items which we will drop ship. These items are noted in the description which states "please call for delivery information" or "delivery may be 2 – 3 wks."

Wicks began in business as Wicks Aircraft Supply in the mid 1970's when we built a KR-2 experimental kit airplane and flew it to the Oshkosh EAA AirVenture Air Show. Soon after, we made arrangements with Ken Rand, the designer of KR-2, to supply a complete kit of materials and supplies needed to build this experimental aircraft. This homebuilt kit included all of the fiberglass cloth, epoxy, aircraft plywood, aircraft spruce, fittings, aircraft hardware, 4130 chromoly tubing, 4130 chromoly sheet, control cable, turnbuckles, aircraft tools, wood glue, foam, wheels and brakes that our customers needed to build this aircraft. In time we developed more than thirty different homebuilt experimental aircraft kits.

Today Wicks not only carry aircraft parts and supplies for experimental aircraft kit builders, but for General Aviation aircraft as well. Many of our parts and supplies are FAA certified, PMA, STC'd parts and supplies that we can provide certification papers for. If you need certification papers please make your request with our customer service people or make a note in the notes section of the web site order form. Some fees are added to cover the cost of providing the papers.

This year we changed our name from Wicks Aircraft Supply to Wicks Aircraft and Motorsports. We did this primarily to recognize the large number of customers who have been coming to us over the years to purchase parts, tools and supplies for their motor sports vehicles. These customers figured out that Wicks has many of the high quality, strong, light weight parts and materials they need for their project. Many of our local customers have been coming in for their dragster cars, dragster motorcycles, stock cars, midget cars, ATV's, specialty race cars, NASCAR's, Formula cars, race boats, sailboats, quarter midget racers, and go carts. We included Motorsports in our name to make it easier for more racing enthusiast to find out that items we carry are well suited for these and many other builders' applications in the motorsports world.

Thank you for finding us on the web. We hope you enjoy searching our site for the items you are looking for and that you find what you need. Please give us a call if you need some help.
